OUR EDUCATION BACKGROUND IN MALAWI

My name is Jonathan Thawani, am a boy of 14 years old and I learn at Mtendere Secondary School. In our country the highest population of students go to government school only few students manage to go to private schools. As a result in government schools more children's are there comparing to teachers therefore it is not easy to understand what the teacher is teaching because of overcrowding of students in classes. This contribute to failure of students in class.

During primary school level children's has an opportunity to go to school because we have free school education. We do not pay school fees but we have the responsibility to provide ourselves with school commodities like all school basic needs including school fund. This fund is used for school development within the camps, for emergency maintenances and other needs for the school. But most of children's fail to complete primary school level because their parents do not manage to provides these needs.

At Secondary School level, this is another difficulty level . After struggling with primary school level most of the parents fail to pay school fees to their children's. At Secondary School level it is a must to pay school fees, if a student has no school fees he/she is allowed to attend classes. Therefore some of the students fail to finish this level because of lucking school fees and basic needs.

we are very glad, me and my fellow friends because of the help you support us. We all say thanks for giving us maize flour,sugar,soap, soya meat and other commodities to mention a few. Other students search these basic needs on their on therefore they do not have enough time to make their studies popery. During this covid 19 period you help us with face mask to protect ourself from contacting corona virus.

In conclusion, on behave of all my fellow students let me have this opportunity to say a big thanks to mum Shinna, the Church of Cregah, and all well wishers through Chifundo centre 3 for giving us your support. We are all say thankful for helping us, and your help will even help my country and entire family too, because the knowledge I have today will help to contribute something positive to my friends,family and others to the whole Malawi. And am promising to continue working hard to pass exams with flower colours. As you are continuing helping may Almighty God bless you with a big blessings and with long life in Jesus name.
